

# Martin Bautista

## Full Stack Web Developer

martinbautista0288@outlook.com | 09491136043 | Mabalacat, Philippines | <https://www.linkedin.com/in/martin-bautista-637525358/>

### SUMMARY

Full-Stack Web Developer with hands-on experience building modern web applications using React, Next.js, TypeScript, Python, Django, Django REST Framework, and PostgreSQL. Experienced in developing responsive frontend applications, RESTful APIs, authentication and role-based access control, database-backed systems, and third-party API integrations. Comfortable working across the frontend and backend to design, implement, and maintain end-to-end features. Familiar with AI and interested in applying AI-driven automation to streamline repetitive business workflows. Strong problem-solving skills with the ability to work independently, communicate technical decisions clearly, and adapt to new technologies and requirements.

### EXPERIENCE

**Mobile Developer — Intern**

Feb 2025 – April 2025

Geo Pro Global Solutions — Clark Freeport and Special Economic Zone, Philippines

- Developed responsive, cross-platform mobile applications using Flutter and Dart, adhering to Clean Architecture patterns and modern UI/UX principles to deliver seamless experiences across iOS and Android platforms.
- Architected and tested robust REST API integration workflows using Postman, accelerating backend connectivity and reducing endpoint errors throughout the development lifecycle.

### EDUCATION

Bachelor of Science in Information Technology

2025

Mabalacat City College

Dolores Mabalacat City, Pampanga

### TECHNICAL SKILLS

**Programming Languages:** Python, Javascript, Typescript,

**Frontend Development:** React, NextJS, Typescript, Javascript, HTML5, CSS3, Tailwind CSS, Zustand, Zod, Tanstack Query, React Hook Form

**Backend Development:** Python, Django, Django Rest Framework, RESTful API Development, API Integration

**Database & Data:** PostgreSQL, MySQL, Prisma ORM

**Infrastructure & Tools:** Git, Vercel, Render, Redis, Postman, REST APIs, Third-Party API Integration

**Soft skills:** Problem-Solving, Adaptability, Communication, Team Collaboration

### PROJECTS

**NegosyoAI**

Aug 2026 – Present

Fullstack web developer

- Architecting a multi-tenant SaaS platform using Django REST Framework, React, TypeScript, and Tailwind CSS with complete tenant data isolation.
- Developing role-based access control (RBAC) across Django APIs and React interfaces to manage owner, manager, and staff permissions securely.

- Building an integrated conversational AI assistant to deliver real-time operational insights and answer store performance queries.
- Building POS and inventory management workflows with back-end engines for automated supplier procurement, predictive restocking, and profit/COGS calculations.
- Utilizing Git for version control alongside Gemini/ChatGPT for AI-assisted development, debugging, and code optimization.

## Template API

Jul 2026 – Aug 2026

### Backend Developer

- Developed a reusable layered Django REST Framework architecture with Serializer, Service, Selector, and Infrastructure layers.
- Implemented JWT authentication, registration, login, email verification, reset password, forgot-password, and password-related account flows.
- Implemented Redis-backed API idempotency keys to prevent duplicate request processing and replay previously generated responses.
- Implemented API rate limiting using Django REST Framework throttling to control request frequency and protect API resources.
- Developed centralized exception handling, exception mapping, and standardized API responses.
- Implemented DRF-based filtering, search, ordering, and pagination.
- Implemented centralized audit logging for create, update, and delete operations, as well as authentication and account workflows such as login, email verification, and password management and adding payload sanitization, including sensitive-field exclusion and email masking.
- Implemented configurable email delivery with environment-based settings for authentication and account workflows.

## FeatureHub

Jun 2026 – Jul 2026

### Fullstack Web Developer

- Developed a full-stack feature request platform using React, Next.js, Supabase, Prisma, and PostgreSQL.
  - Implemented secure email/password and Google OAuth authentication using Supabase Auth.
  - Developed a feature request management system enabling users to create, publish, update, and manage product feedback.
  - Integrated a commenting system to facilitate discussions and feedback on individual feature requests.
  - Implemented search and filtering functionality to improve feature discovery and content navigation.
- Designed and managed database models and relationships using Prisma ORM and PostgreSQL.

## Quantumways Builder Inventory

Jun 2025 – Dec 2025

### Backend Developer

- Developed RESTful APIs using Django REST Framework to support inventory management, service repair, delivery records, and core application workflows.
- Engineered a JWT-based authentication system using Django REST Framework to secure API access and restrict system functionality to authorized staff.
- Implemented CRUD and bulk deletion operations across Masterlist, Service Repair, and Delivery Records modules to support efficient inventory data management.
- Developed a centralized file management system with Excel import/export functionality to facilitate bulk inventory data processing and management.

## Kidneycare

Apr 2025 – Jun 2025

## Backend Developer

- Developed RESTful APIs using Python, Django, and Django REST Framework to support core application features, data management, and backend workflows.
- Engineered a JWT-based authentication system using Django REST Framework to secure user authentication and API access for sensitive application data.
- Developed an appointment scheduling module to support patient-provider bookings and appointment management workflows.
- Integrated WebSocket technology to implement real-time communication between patients and healthcare providers.

## Hoa-Unity

Jul 2024– Nov 2024

### Fullstack Web Developer

- Developed a community issue reporting module using PHP, jQuery, and AJAX, supporting issue categorization, photo attachments, and status updates.
- Implemented a centralized service request system with workflow management for maintenance and repair requests, supporting structured request processing and tracking.
- Developed an activity logging system to record administrative actions performed by secretaries, treasurers, and auditors, providing traceability across platform operations.
- Developed an amenity booking and calendar scheduling system using PHP, jQuery, and AJAX to manage facility reservations and provide calendar-based availability and schedule tracking.
