

Martin Bautista

PROFESSIONAL SUMMARY

Software Developer and Information Technology graduate with hands-on experience building web applications and RESTful APIs using Django, React, NextJS, and SQL Databases (PostgreSQL, MYSQL). Adapt at writing clean, maintainable code across projects, from freelance client solutions to database-driven web platforms. Passionate about leveraging strong problem-solving skills and modern technologies to build efficient, user-centric software.

WORK EXPERIENCE

Mobile Developer – Internship – Onsite Feb 2025 - Apr 2025

Geo Pro Global Solutions — Clark Freeport and Special Economic Zone

- Developed responsive mobile applications using the Flutter framework, ensuring a seamless, cross-platform user experience that adhered to modern UI/UX principles.
- Architected and tested robust integration workflows utilizing REST APIs and Postman, accelerating backend connectivity and reducing endpoint errors during development.
- Championed advanced version control practices through hands-on Git implementation, optimizing team collaboration and minimizing code conflicts in the shared repository.

PROJECTS

Quantumways Builders Inventory Jun 2025 - Dec 2025

Backend Developer

- Engineered a secure JWT-based authentication system for system access control, restricting platform entry exclusively to authorized staff.
- Implemented full CRUD and bulk delete functionalities across the Masterlist, Service Repair, and Delivery Records modules, minimizing administrative overhead and streamlining data management workflows.
- Developed a centralized file management system with integrated import/export tools, enabling seamless Excel data integration for accelerated inventory operations.

Kidneycare Jun 2025 - Aug 2025

Backend Developer

- Architected a secure JWT-based authentication system to manage user sessions, safeguarding sensitive medical data and ensuring strict HIPAA-compliant access control.
- Developed a centralized appointment scheduling module for patient-provider bookings, reducing administrative overhead and minimizing scheduling conflicts.
- Integrated a real-time chat system utilizing WebSocket technology to facilitate instant provider communication, improving medical inquiry response times and patient engagement.

Hoa-Unity Jul 2024 - Nov 2024

Fullstack Web Developer

- Built a community issue reporting module equipped with categorization, photo attachments, and real-time status tracking, empowering residents to efficiently report concerns and track resolution progress.
- Developed a centralized service request system featuring integrated workflow management for maintenance and repairs, accelerating dispatch times and organizing maintenance pipelines.
- Created a comprehensive activity logging system capturing secretary, treasurer, and auditor actions, ensuring complete transparency and strict platform accountability for administrative operations.
- Implemented an amenity booking system allowing residents to reserved shared facilities including the clubhouse and basketball courts, eliminating schedule conflicts and simplifying resource management.

Xev-curity

Jul 2023 - Nov 2023

Fullstack Mobile Developer

- Developed a comprehensive lost-and-found application featuring image uploads, user identification, and recovery tracking, streamlining item matching workflows and expediting successful item returns.
- Engineered a secure, session-based authentication system to manage user access and state, safeguarding user data and preventing unauthorized access to protected platform pages.
- Built a digital incident reporting feature with rich text descriptions and media attachments, enabling users to document security concerns instantly and improving administrative response times.

FeatureHub

Jul 2026 – Present

Fullstack Web Developer

- Built a full-stack feature request platform using React, Next.js, Django REST Framework, and PostgreSQL.
- Implemented secure user authentication using Email/Password and Google OAuth.
- Developed a feature request system that allows users to create, publish, and manage product.
- Integrated a comment system to facilitate discussions and feedback on individual feature requests.
- Implemented search and filtering functionality to help users quickly discover relevant feature requests.
- Built a voting system that enables users to upvote feature requests and prioritize community-driven ideas.
- Created a centralized feedback platform that encourages community engagement and collaboration on product improvements.

EDUCATION

Aug 2025

Bachelor of Science in Information Technology

Mabalacat City College

Dolores Mabalacat City, Pampanga

SKILLS

Languages: PHP, Python, C#, Java, Dart, Javascript

Frameworks & Libraries: React, NextJS, Django, Flutter

Databases & ORM: PostgreSQL, MYSQL, Eloquent ORM, Prisma ORM

Soft: Problem Solving, Adaptability, Attention to Detail, Communication
